

UBER Data Scientist Positions

Are you interested in developing and applying quantitative solutions related to Uber's problems? Do you believe data builds better products and has a key role in product decisions? This is the job for you.

Uber's Data Scientist partner with Uber's product and engineering teams to drive actionable data insights and solutions from some of the world's most interesting datasets. Our Data Scientists work on every aspect of the product — whether it's exploratory research to understand user behavior for riders and drivers, or running experiments to optimize untapped areas of growth, or building machine learning models to mitigate fraud on our platform. The perfect candidate will have a strong quantitative background, will be able to tackle abstract business and engineering problems with extreme precision, and has the enthusiasm and initiative necessary to deliver those answers at Uber's breakneck pace.

UBER Positions:

- [Data Science- Advanced Analytics](#)
Location: San Francisco, CA & Seattle, WA
- [Data Scientist - China Growth \(ML\)](#)
Location: San Francisco, CA
- [Marketplace Optimization](#)
Location: San Francisco, CA
- [Data Scientist- Machine Learning Platform](#)
Location: San Francisco, CA
- [Advanced Technologies Center \(Self Driving Technologies\)](#)
Location: Pittsburgh, PA

PERKS:

- Employees are showered with Uber credits each month.
- The rare opportunity to change the world such that everyone around you is using the product you built. We're not just another social web app, we're moving real people and assets and reinventing transportation and logistics globally.
- Sharp, motivated co-workers in a fun office environment.
